

1. 2FA — Two-Factor Authentication
2. ADSL — Asymmetric Digital Subscriber Line
3. AI — Artificial Intelligence
4. ALU — Arithmetic Logic Unit
5. ANN — Artificial Neural Network
6. AR — Augmented Reality
7. ASCII — American Standard Code for Information Interchange
8. BASIC — Beginner's All-purpose Symbolic Instruction Code
9. BD — Blu-ray disc
10. BIOS — Basic Input/Output System
11. CAPTCHA — Completely Automated Public Turing test to tell Computers and Humans Apart
12. CD-R — Compact Disc Recordable
13. CD-ROM — Compact Disc Read-Only Memory
14. CD-RW — Compact Disc Rewritable
15. CGI — Computer-Generated Image
16. CLI — Command Line Interface
17. CNN — Convolutional Neural Network
18. CPU — Central Processing Unit
19. CSS — Cascading Style Sheets
20. DDoS — Distributed Denial of Service
21. DDR4 — Double Data Rate 4
22. DNS — Domain Name System
23. DoS — Denial of Service
24. DRAM — Dynamic Random Access Memory
25. DSL — Digital Subscriber Line
26. DVD — Digital Versatile Disc
27. EEPROM — Electrically Erasable Programmable Read-Only Memory
28. ENIAC — Electronic Numerical Integrator and Computer
29. EPROM — Erasable Programmable Read-Only Memory
30. FGT — Floating Gate Transistors
31. FORTRAN — FORMula TRANslator
32. FTP — File Transfer Protocol
33. GB — Gigabyte
34. GHz — Gigahertz
35. GSM — Global System for Mobile Communications
36. GUI — Graphical User Interface
37. HDD — Hard Disk Drive
38. HLAI — Human-Like Artificial Intelligence; Human-Level Artificial Intelligence
39. HTML — Hyper Text Markup Language
40. HTTP — Hyper Text Transfer Protocol
41. IBM — International Business Machines
42. ICANN — Internet Corporation for Assigned Names and Numbers
43. IoT — the Internet of Things

44.IR — Instruction Register
45.ISDN — Integrated Services Digital Network
46.ISP — Internet Service Provider
47.JS — JavaScript
48.JVM — Java Virtual Machine
49.KB — Kilobyte
50.LAN — Local Area Network
51.LCD — Liquid Crystal Display
52.MAC address — Media Access Control address
53.MAN — Metropolitan Area Network
54.MFA — Multi-Factor Authentication
55.ML — Machine Learning
56.MROM — Masked Read-Only Memory
57.MS Word — Microsoft Word
58.MS-DOS — Microsoft Disk Operating System
59.NAND Flash — Not AND Flash
60.NN — Neural Networks
61.NOR Flash — Not OR Flash
62.OOP — Object-Oriented Programming
63.OS — Operating System
64.OSI — Open System Interconnection
65.PAN — Personal Area Network
66.PC – Personal Computer
67.PC — Program Counter
68.PHP — Hypertext Preprocessor
69.PROM — Programmable Read-Only Memory
70.RAM — Random Access Memory
71.RNN — Recurrent Neural Network
72.ROM — Read-Only Memory
73.SDRAM — Synchronous Dynamic Random Access Memory
74.SDSL — Symmetric Digital Subscriber Line
75.SEO — Search Engine Optimization
76.SMT — Simultaneous Multi-threading Technology
77.SMTP — Simple Mail Transfer Protocol
78.SQL — Structured Query Language
79.SRAM — Static Random Access Memory
80.SSD — Solid State Drive
81.SSL — Secure Sockets Layer
82.TB — TByte, Terabyte
83.TCP/IP — the Transmission Control Protocol and the Internet Protocol
84.UDP — User Datagram Protocol
85.UIDs — Unique Identifiers
86.UNIVAC I — Universal Automatic Computer
87.URL — Uniform Resource Locator
88.USB — Universal Serial Bus

- 89.VDSL — Very High Bit Rate DSL
- 90.VR — Virtual Reality
- 91.WAF — Web Application Protection Firewall
- 92.WAN — Wide Area Network
- 93.Wi-Fi — Wireless Fidelity
- 94.WiMAX — Worldwide Interoperability for Microwave Access
- 95.WIMP — Windows Icons Menus Pointer
- 96.WLAN — Wireless Local Area Network
- 97.WWW — World Wide Web
- 98.WYSIWYG — What You See Is What You Get
- 99.Yandex — Yet Another iNDEXer
